

# Vaccine Coverage

## Through CareFirst prescription drug benefits

With the added risks of COVID-19, it's more important than ever to get your flu shot. The Centers for Disease Control and Prevention (CDC) recommends everyone six months of age and older receive the flu vaccine every season.

Members who have **CareFirst prescription drug benefits** can get their vaccines at one of the 64,000 participating pharmacies through our pharmacy benefit manager, CVS Caremark\*.

Participating pharmacies include major chains such as CVS, Costco, Giant, Rite Aid, Walgreens, Walmart and many independent pharmacies (see next page).

To find out if a pharmacy that isn't listed accepts your card, call the pharmacy directly.

### Vaccine information

In addition to the flu vaccine, the following vaccines are also covered under your CareFirst benefits. If you have any questions, speak to your doctor before receiving a vaccine.

- **COVID-19**—COVID-19 vaccines reduce the risk of severe illness, hospitalization, and death from COVID-19.
- **HPV**—HPV vaccine protects against cancers caused by human papillomavirus (HPV) infection.
- **Meningococcal**—Meningococcal vaccines protect against bacteria that can cause meningitis or septicemia.
- **MMR**—MMR vaccine protects against measles, mumps, and rubella.
- **Pneumococcal**—Pneumococcal vaccines protect against bacteria that can cause pneumonia.
- **RSV**—RSV vaccines protect against lower respiratory tract disease caused by respiratory syncytial virus (RSV). While RSV usually causes mild cold-like symptoms in people of all ages, it can be especially serious for infants and older adults leading to hospitalization or death.
- **Shingles**—Shingles vaccine is recommended for adults 50 years and older to prevent shingles and postherpetic neuralgia (PHN).
- **Tdap or DTaP**—These combination vaccines protect against three potentially life-threatening bacterial diseases: tetanus, diphtheria, and pertussis (whooping cough).
